BUILD IT YOURSELF · RAG WORKSHOP

Ask a 10-K.
Get the receipts.

Build an AI that answers questions about Apple's annual report and shows exactly where every answer came from.

THE PROBLEM

121 pages
of dense financial filing. Nobody reads it to find one number.

Guesses
Ask a chatbot directly and it may make numbers up.

No proof
Even a right answer is useless if you can't check it.

THE FIX

Your question → Find the right pages → Answer + citation or "Not found"

BRING TO THE SESSION

A laptop
macOS, Linux or Windows

Python 3.11+
python.org

uv
Python package manager

Git
to get the code

An API key
OpenAI or Google Gemini

Docker
optional, not required
